PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA: 9.18/10.00) with strong foundations in Data Structures & Algorithms, Full-Stack Development, and Machine Learning. Experienced in building scalable web applications using MERN Stack and FastAPI, with growing expertise in Generative AI, Large Language Models (LLMs), and Google Cloud technologies. Passionate about solving real-world problems through software engineering and data-driven systems.

EDUCATION

2024 – Present **Bachelor of Technology, Computer Science & Engineering** — SRM University, AP CGPA: **9.18/10**

TECHNICAL SKILLS

Languages	Python, C++, JavaScript (ES6+), SQL, HTML5, CSS3
ML & AI	Machine Learning, Generative AI, Large Language Models (LLMs), Prompt Engineering
Web Technologies	React.js, Node.js, Express.js, FastAPI, REST APIs, JWT Authentication, Responsive Design
Databases	MongoDB, MongoDB Atlas, Mongoose ODM, MySQL
Tools & Cloud	Git, GitHub, Google Cloud Platform (GCP), Postman
Core CS Concepts	Data Structures & Algorithms, Object-Oriented Programming, DBMS, OS, Computer Networks

EXPERIENCE

Google Cloud Generative AI Intern — APSCHE SMARTBRIDGE May 2026 – Present

- Working with Google Cloud Platform (GCP), Vertex AI, and Large Language Models (LLMs) to develop AI-powered applications.
- Exploring prompt engineering, Generative AI workflows, and cloud-based deployment practices through hands-on projects.
- Building practical knowledge of machine learning pipelines, AI model integration, and scalable cloud infrastructure.

PROJECTS

CareSync — Smart Medication Reminder System [GitHub](#) | [Live](#)

Python, FastAPI, React.js, MySQL, Twilio API, Deep Translator

- Developed a full-stack healthcare application using FastAPI, React.js, and MySQL for medication tracking and automated reminder management.
- Designed RESTful APIs and integrated APScheduler-based automation for scheduled medication notifications.
- Implemented Twilio WhatsApp messaging and Deep Translator APIs to deliver multilingual reminders for improved accessibility.

Trip Planner — Full-Stack Travel Platform [GitHub](#) | [Live](#)

React.js, Node.js, Express.js, MongoDB Atlas, JWT

- Developed a MERN-stack travel management platform with JWT-based authentication and protected routes.
- Built responsive user interfaces using React.js and integrated MongoDB Atlas for real-time trip data management.
- Designed and implemented REST APIs for itinerary planning and booking workflows.

Minify — Base62 URL Shortener [GitHub](#) | [Live](#)

MongoDB, Express.js, React.js, Node.js (MERN), Custom Base62

- Built a scalable URL shortening service using the MERN stack and a custom Base62 encoding algorithm.
- Developed RESTful APIs for URL generation, storage, and redirection while ensuring collision-free mappings.
- Designed MongoDB-backed persistence layers for efficient URL retrieval and management.

Platea — Restaurant Management System [GitHub](#) | [Live](#)

Python, Flask, SQL, HTML, CSS

- Developed a full-stack restaurant management platform using React, Express, and MongoDB to automate self-service table reservations and order fulfillment.
- Designed a dynamic, programmatic floor plan interface and implemented RESTful APIs for real-time state management of table statuses and billing.
- Built a live order tracking queue with automated polling and implemented role-based access control for secure customer, staff, and admin workflows.

CERTIFICATIONS

MongoDB Associate Developer — Certification [\[Link\]](#) Apr 2026

- Demonstrated proficiency in document-oriented databases by completing the MongoDB developer path and passing the certification exam.

Participant — Quantum Valley Hackathon [\[Link\]](#) Aug 28, 2025

- Solved complex challenges and collaborated on innovative technical solutions.

Participant — Hack MSC 2.0 [\[Link\]](#) Nov 1, 2025

- Rapidly prototyped and engineered software solutions under strict time constraints.

Certified Professional — Python [\[Link\]](#) June 9, 2025

- Demonstrated proficiency in Python programming concepts and application.
